

Do listening checks:

Listen to your hearing aids every day. You should make sure that there are no breaks in the output sound. You should listen for feedback, or a whistling sound from the aids.

Clean your hearing aids daily:

It can protect against accumulation of earwax, dirt and dust into various parts of hearing aid. Make sure you change the tubing at least once in 3-4 months

Store your hearing aid in a safe and secure place:

Keep the hearing aid away from moisture and store it in a cool and dry place.

Take off your hearing aid:

While taking a shower, swimming, sleeping or using a hair spray.

Check the batteries: Batteries should be checked and replaced regularly to ensure good hearing aid performance.

Maintain ear hygiene: Even though ear wax has favorable attributes it can cause severe damage to your hearing aids. So maintain ear hygiene. If ear wax is significant, think about scheduling a visit with a professional.

Make sure:

- Battery door is fully closed.
- Ear wax is cleaned from your hearing aid.
- To use dry kit to save your hearing aid from moisture.
- To keep your hearing aids away from little hands and pets.
- You don't drop the hearing aid as the hearing aid parts are very delicate.
- The Hearing aid is kept away from other electronic devices

For better performance of your hearing aid visit your audiologist regularly.
